CS301 - Web Application Development Project

Objective: Develop a full-stack web application that demonstrates your understanding of modern web architecture and database management.

Deliverables:

1. A functional web application running on local server
2. Complete source code repository with comprehensive README
3. Project report (minimum 10 pages) in PDF format
4. A 10-minute video presentation demonstrating all features

Requirements & Constraints:

- Frontend must use React.js and backend must use Node.js Express.
- Database: PostgreSQL or SQLite with relational schema.
- Must include user authentication and validation middleware.
- Maximum team size: 2 students. Plagiarism will result in an immediate zero.

Deadlines & Submission:

Final Submission Deadline: December 15, 2024 at 11:59 PM.
Upload all archive files and documentation to the University Learning Portal.

Evaluation Criteria:

- Working Application: 40 marks
- Code Quality & MVC Architecture: 20 marks
- Project Report: 25 marks
- Video Demo: 15 marks
